

★ COMMENTS TAGS

wp_list_comments

Displays all comments for a post or page based on a variety of parameters including ones set in the administration area.

```
<?php wp_list_comments( $args ); ?>
```

\$args /walker | max_depth | style | callback [end_callback] type |page| per_page|avatar_size|reverse_top_level| reverse_children

comment_id_fields

Generates two hidden inputs for the comment_form to identify the comment_post_ID and comment_parent for threaded comments.

```
<?php comment_id_fields(); ?>
```

comment_author

Displays the comment author name; that is, the one supplied by the commenter.

```
<?php comment_author(); ?>
```

comment_number

Displays the total number of comments, Trackbacks, and Pingbacks for a post.

```
<?php comments_number('zero', 'one', 'more'); ?>  
zero'{$} / 'one'{$} / 'more'{$}
```

comments_link

Displays the URL to a post's comments.

```
<?php comments_link(); ?>
```

* comments_rss_link

This function has been deprecated, please use post_comments_feed_link()

```
<?php comments_rss_link('text', 'file'); ?>  
'text'{$} / 'file'{$}
```

comments_popup_script

Outputs the JavaScript code for a comments popup window.

```
<?php comments_popup_script($width, $height); ?>  
width {$int} / height {$int}
```

comments_popup_link

Displays a link to the comments popup window if comments_popup_script() is used, otherwise it displays a normal link to comments.

```
<?php comments_popup_link  
( 'zero', 'one', 'more', 'CSSClass', 'none' ); ?>  
'linktext'{$} / 'before'{$} / 'after'{$}
```

comment_author_url_link

Displays the comment author's URL (usually their web site), not linked.

```
<?php comment_author_url(); ?>
```

comment_author_email

Displays the comment author's email address, not linked.

```
<?php comment_author_email(); ?>
```

comment_form_title

Displays text based on comment reply status.

```
<?php comment_form_title('d'); ?>
```

comment_form_link

Displays text based on comment reply status.

```
<?php comment_form_link('Label'); ?>
```

comment_form_text

Displays the comment author's name formatted for RSS.

```
<?php comment_author_rss(); ?>
```

comment_id

Displays the numeric ID of a comment.

```
<?php comment_ID(); ?>
```

comment_type

Displays the type of comment (regular comment, Trackback or Pingback) a comment entry is.

```
<?php comment_type  
( 'comment', 'trackback', 'pingback' ); ?>
```

comment_reply_link

Displays a link that lets users post a comment in reply to a specific comment.

```
<?php comment_reply_link  
( $args, array  
( 'reply_text' => 'Reply', 'add_below' =>  
$add_below, 'depth' => $depth, 'max_depth' =>  
$args['max_depth'] ) ); ?>
```

comment_text

Displays the text of a comment.

```
<?php comment_text(); ?>
```

comment_excerpt

Displays an excerpt (maximum of 20 words) of a comment's text.

```
<?php comment_excerpt(); ?>
```

comment_date

Displays the date a comment was posted.

```
<?php comment_date('d'); ?>
```

comment_time

Displays the time a comment was posted.

```
<?php comment_time('d'); ?>
```

comment_form_link

Displays the comment author's email address, as a mailto link.

```
<?php comment_author_email_link  
( 'linktext', 'before', 'after' ); ?>  
'linktext'{$} / 'before'{$} / 'after'{$}
```

comment_author_url

Displays the comment author's URL (usually their web site), not linked.

```
<?php comment_author_url(); ?>
```

comment_author_email

Displays the comment author's email formatted for RSS.

```
<?php comment_author_rss(); ?>
```

comment_text_rss

Displays the comment author's name formatted for RSS.

```
<?php comment_text_rss(); ?>
```

comment_text_links

Generates a new way to list the paged comments in the comment template. Instead of using Previous or Next Comments links, it displays a full list of comment pages using numeric indexes.

```
<?php paginate_comments_links( $args ); ?>
```

comment_avatar

Retrieves the avatar for a user who provided a user ID or email address.

```
<?php echo get_avatar  
( $id_or_email, $size, $default, $alt ); ?>
```

comment_author_ip

Displays the comment author's IP address.

```
<?php comment_author_IP(); ?>
```

permalink_comments_rss

Displays the permalink to the post to which a comment belongs, formatted for RSS.

```
<?php permalink_comments_rss(); ?>
```

comment_reply_link

Displays a link that lets users post a comment in reply to a specific comment.

```
<?php comment_reply_link  
( $args, array  
( 'reply_text' => 'Reply', 'add_below' =>  
$add_below, 'depth' => $depth, 'max_depth' =>  
$args['max_depth'] ) ); ?>
```

comment_text

Displays the text of a comment.

```
<?php comment_text(); ?>
```

comment_excerpt

Displays an excerpt (maximum of 20 words) of a comment's text.

```
<?php comment_excerpt(); ?>
```

comment_date

Creates a link to the previous comments page containing older comments.

```
<?php previous_comments_link( 'Label' ); ?>
```

comment_time

Creates a link to the next comments page containing newer comments.

```
<?php next_comments_link( 'Label' ); ?>
```

comment_form_link

Creates a link to the previous comments page containing older comments.

```
<?php previous_comments_link( 'Label' ); ?>
```

comment_author_url

Creates a link to the next comments page containing newer comments.

```
<?php next_comments_link( 'Label' ); ?>
```

comment_author_email

Creates a link to the previous comments page containing older comments.

```
<?php previous_comments_link( 'Label' ); ?>
```

comment_text_rss

Creates a link to the next comments page containing newer comments.

```
<?php next_comments_link( 'Label' ); ?>
```

comment_text_links

Generates a new way to list the paged comments in the comment template. Instead of using Previous or Next Comments links, it displays a full list of comment pages using numeric indexes.

```
<?php paginate_comments_links( $args ); ?>
```

comment_avatar

Retrieves the avatar for a user who provided a user ID or email address.

```
<?php echo get_avatar  
( $id_or_email, $size, $default, $alt ); ?>
```

comment_author_ip

Displays the comment author's IP address.

```
<?php comment_author_IP(); ?>
```

comment_id

Displays the numeric ID of a comment.

```
<?php comment_ID(); ?>
```

★ CATEGORY TAGS

the_category

Displays a link to the category or categories a post belongs to.

```
<?php the_category( $separator, $parents ); ?>
$separator {s} / $parents {s}
```

the_category_rss

Displays the name of the category or categories a post belongs to in RSS format.

```
<?php the_category_rss( $type ); ?>
$type {s} / $display {s}
```

single_cat_title

Displays or returns the category title for the current page.

```
<?php single_cat_title( $prefix, $display ); ?>
$prefix {s} / $display {s}
```

category_description

Returns the description of a category.

```
<?php echo category_description( $category ); ?>
$category {s}
```

wp_dropdown_categories

Displays a list of categories in a select (i.e dropdown) box with no submit button.

```
<?php wp_dropdown_categories( $args ); ?>
$args / show_option_all | show_option_none | orderby | order
| show_last_update | show_count | hide_empty | child_of |
exclude | echo | selected | hierarchical | name | class | depth
```

wp_generate_tag_cloud

Returns an HTML string that makes a tag cloud.

```
<?php wp_tag_cloud( $tags, $args ); ?>
$args / smallest | largest | unit | number | separator |
orderby | order | exclude | include | link | taxonomy | echo
| args / optioncount | exclude | admin | show_fullname |
hide_empty | echo | feed | feed_image | style | html
```

wp_list_categories

Displays a list of Categories as links.

```
<?php wp_dropdown_categories( $args ); ?>
$args / show_option_all | orderby | order | show_last_update |
style | show_count | hide_empty | use_desc_for_title | child_of |
feed_type | feed_image | exclude | exclude_tree | include |
current_category | hierarchical | title_li | number | echo | depth
```

★ TAG TAGS

the_tags

This template tag displays a link to the tag or tags a post belongs to.

```
<?php the_tags( $before, $separator, $after ); ?>
$before {s} / $separator {s} / $after {s}
```

tag_description

First available with WordPress Version 2.8, this template tag returns the description of a tag.

```
<?php tag_description( $tagID ); ?>
$tagID / {s}
```

single_tag_title

Displays or returns the tag title for the current page.

```
<?php single_tag_title( $prefix, $display ); ?>
$prefix {s} / $display {s}
```

wp_tag_cloud

Available with WordPress Version 2.3, this template tag wp_tag_cloud displays a list of tags in what is called a tag cloud, where the size of each tag is determined by how many times that particular tag has been assigned to posts.

```
<?php wp_tag_cloud( $args ); ?>
$args / smallest | largest | unit | number | separator |
orderby | order | exclude | include | link | taxonomy | echo
| args / optioncount | exclude | admin | show_fullname |
hide_empty | echo | feed | feed_image | style | html
```

wp_generate_tag_cloud

Returns an HTML string that makes a tag cloud.

```
<?php wp_tag_cloud( $tags, $args ); ?>
$args / smallest | largest | unit | number | separator |
orderby | order | topic | count_text_callback | filter
| topic_count_scale_callback | filter
```

wp_list_authors

Displays a list of the blog's authors (users), and if the user has authored any posts, the author name is displayed as a link to their posts.

```
<?php wp_list_authors( $args ); ?>
$args / optioncount | exclude | admin | show_fullname |
hide_empty | echo | feed | feed_image | style | html
```

★ AUTHOR TAGS

the_author

The author of a post can be displayed by using this Template Tag.

```
<?php the_author(); ?>
$before {s} / $separator {s} / $after {s}
```

the_author_link

This tag displays a link to the Website for the author of a post.

```
<?php the_author_link(); ?>
```

the_author_posts

Displays the total number of posts an author has published.

```
<?php the_author_posts(); ?>
```

the_date_xml

This tag displays the date of the post in YYYY-MM-DD format (ex: 2004-09-24).

```
<?php the_date_xml(); ?>
'format' {s} / 'before' {s} / 'after' {s} / echo {b}
```

the_modified_time

This tag displays the time (and date) a post was last modified and is similar to the functionality of the _time() function.

```
<?php the_modified_time(); ?>
$field / user_login | user_pass | user_nickname | user_email |
user_url | user_registered | user_activation_key | user_status |
display_name | nickname | first_name | last_name | description |
jabber | aim | yim | user_level | user_firstname |
user_lastname | user_description | rich_editing |
comment_shortcuts | admin_color | plugins_per_page |
plugins_last_view | ID
$userID / fint
```

wp_list_authors

Displays a list of the blog's authors (users), and if the user has authored any posts, the author name is displayed as a link to their posts.

```
<?php wp_list_authors( $args ); ?>
$args / optioncount | exclude | admin | show_fullname |
hide_empty | echo | feed | feed_image | style | html
```

★ DATE AND TIME TAGS

the_time

Displays the time of the current post.

```
<?php the_time('d'); ?>
```

the_date

Displays or returns the date of a post, or a set of posts if published on the same day.

```
<?php the_date(
'format', 'before', 'after', 'echo');
'format' {s} / 'before' {s} / 'after' {s} / echo {b}
```

the_date

Displays the date of the post in YYYY-MM-DD format (ex: 2004-09-24).

```
<?php the_date(); ?>
'format' {s} / 'before' {s} / 'after' {s} / echo {b}
```

the_modified

This tag displays the time (and date) a post was last modified and is similar to the functionality of the _time() function.

```
<?php the_modified(); ?>
$field / user_login | user_pass | user_nickname | user_email |
user_url | user_registered | user_activation_key | user_status |
display_name | nickname | first_name | last_name | description |
jabber | aim | yim | user_level | user_firstname |
user_lastname | user_description | rich_editing |
comment_shortcuts | admin_color | plugins_per_page |
plugins_last_view | ID
$userID / fint
```

★ DATE AND TIME TAGS

the_time

Displays the time of the current post.

```
<?php the_time('d'); ?>
```

the_date

Displays or returns the date of a post, or a set of posts if published on the same day.

```
<?php the_date(
'format', 'before', 'after', 'echo');
'format' {s} / 'before' {s} / 'after' {s} / echo {b}
```

the_date

Displays the date of the post in YYYY-MM-DD format (ex: 2004-09-24).

```
<?php the_date(); ?>
'format' {s} / 'before' {s} / 'after' {s} / echo {b}
```

the_modified

This tag displays the time (and date) a post was last modified and is similar to the functionality of the _time() function.

```
<?php the_modified(); ?>
$field / user_login | user_pass | user_nickname | user_email |
user_url | user_registered | user_activation_key | user_status |
display_name | nickname | first_name | last_name | description |
jabber | aim | yim | user_level | user_firstname |
user_lastname | user_description | rich_editing |
comment_shortcuts | admin_color | plugins_per_page |
plugins_last_view | ID
$userID / fint
```

★ AUTHOR TAGS

the_author

The author of a post can be displayed by using this Template Tag.

```
<?php the_author(); ?>
$before {s} / $separator {s} / $after {s}
```

the_author_link

This tag displays a link to the Website for the author of a post.

```
<?php the_author_link(); ?>
```

the_author_posts

Displays the total number of posts an author has published.

```
<?php the_author_posts(); ?>
```

the_date

Displays the date of the post in YYYY-MM-DD format (ex: 2004-09-24).

```
<?php the_date(); ?>
'format' {s} / 'before' {s} / 'after' {s} / echo {b}
```

the_modified

This tag displays the time (and date) a post was last modified and is similar to the functionality of the _time() function.

```
<?php the_modified(); ?>
$field / user_login | user_pass | user_nickname | user_email |
user_url | user_registered | user_activation_key | user_status |
display_name | nickname | first_name | last_name | description |
jabber | aim | yim | user_level | user_firstname |
user_lastname | user_description | rich_editing |
comment_shortcuts | admin_color | plugins_per_page |
plugins_last_view | ID
$userID / fint
```

★ DATE AND TIME TAGS

the_time

Displays the time of the current post.

```
<?php the_time('d'); ?>
```

the_date

Displays or returns the date of a post, or a set of posts if published on the same day.

```
<?php the_date(
'format', 'before', 'after', 'echo');
'format' {s} / 'before' {s} / 'after' {s} / echo {b}
```

the_date

Displays the date of the post in YYYY-MM-DD format (ex: 2004-09-24).

```
<?php the_date(); ?>
'format' {s} / 'before' {s} / 'after' {s} / echo {b}
```

the_modified

This tag displays the time (and date) a post was last modified and is similar to the functionality of the _time() function.

```
<?php the_modified(); ?>
$field / user_login | user_pass | user_nickname | user_email |
user_url | user_registered | user_activation_key | user_status |
display_name | nickname | first_name | last_name | description |
jabber | aim | yim | user_level | user_firstname |
user_lastname | user_description | rich_editing |
comment_shortcuts | admin_color | plugins_per_page |
plugins_last_view | ID
$userID / fint
```

★ DATE AND TIME TAGS

the_time

Displays the time of the current post.

```
<?php the_time('d'); ?>
```

the_date

Displays or returns the date of a post, or a set of posts if published on the same day.

```
<?php the_date(
'format', 'before', 'after', 'echo');
'format' {s} / 'before' {s} / 'after' {s} / echo {b}
```

the_date

Displays the date of the post in YYYY-MM-DD format (ex: 2004-09-24).

```
<?php the_date(); ?>
'format' {s} / 'before' {s} / 'after' {s} / echo {b}
```

the_modified

This tag displays the time (and date) a post was last modified and is similar to the functionality of the _time() function.

```
<?php the_modified(); ?>
$field / user_login | user_pass | user_nickname | user_email |
user_url | user_registered | user_activation_key | user_status |
display_name | nickname | first_name | last_name | description |
jabber | aim | yim | user_level | user_firstname |
user_lastname | user_description | rich_editing |
comment_shortcuts | admin_color | plugins_per_page |
plugins_last_view | ID
$userID / fint
```

★ DATE AND TIME TAGS

the_time

Displays the time of the current post.

```
<?php the_time('d'); ?>
```

the_date

Displays or returns the date of a post, or a set of posts if published on the same day.

```
<?php the_date(
'format', 'before', 'after', 'echo');
'format' {s} / 'before' {s} / 'after' {s} / echo {b}
```

the_date

Displays the date of the post in YYYY-MM-DD format (ex: 2004-09-24).

```
<?php the_date(); ?>
'format' {s} / 'before' {s} / 'after' {s} / echo {b}

jabber | aim | yim | user_level | user_firstname |
user_lastname | user_description | rich_editing |
comment_shortcuts | admin_color | plugins_per_page |
plugins_last_view | ID
$userID / fint
```

★ DATE AND TIME TAGS

the_time

Displays the time of the current post.

```
<?php the_time('d'); ?>
```

the_date

</

★ EDIT LINK TAGS

edit_post_link

Displays a link to edit the current post, if a user is logged in and allowed to edit the post.

```
<?php edit_post_link  
    ('$link', '$before', '$after', '$post'); ?>
```

\$link {s} / \$before {s} / \$after {s} / \$post {int}**edit_comment_link**

Displays a link to edit the current comment, if the user is logged in and allowed to edit the comment.

```
<?php edit_comment_link  
    ('$link', '$before', '$after'); ?>
```

\$link {s} / \$before {s} / \$after {s}**edit_tag_link**

Displays a link to edit the current tag, if the user is logged in and allowed to edit the tag.

```
<?php edit_tag_link  
    ('$link', '$before', '$after', '$tag'); ?>
```

\$link {s} / \$before {s} / \$after {s} / \$tag {int}**edit_bookmark_link**

Displays a link to edit the current bookmark, if the user is logged in and allowed to edit the bookmark.

```
<?php edit_bookmark_link  
    ('$link', '$before', '$after', '$bookmark'); ?>
```

\$link {s} / \$before {s} / \$after {s} / \$bookmark {int}

★ TRACKBACK TAGS

trackback_url

Displays or returns the trackback URL for the current post.

```
<?php trackback_url('display'); ?>
```

display {b}**trackback_rdf**

Outputs the trackback RDF information for a post.

```
<?php trackback_rdf(); ?>
```

★ PERMALINK TAGS

permalink_anchor

Outputs a permalink anchor identifier or id="...") for a post. This is useful for linking to a particular post on a page displaying several posts, such as an archive page.

```
<?php permalink_anchor('type'); ?>
```

\$type {s}**get_permalink**

Returns the permalink to a post for use in PHP. It does NOT display the permalink and can be used outside of the Loop.

```
<?php $ permalink = get_permalink($id); ?>
```

\$id {int}**the_permalink**

Displays the URL for the permalink to the post currently being processed in The Loop.

```
<?php the_permalink(); ?>
```

permalink_single_rss

Displays the permalink for the current post, formatted for syndication feeds such as RSS or Atom.

```
<?php permalink_single_rss('file'); ?>
```

\$file {s}

★ LINKS MANAGER TAGS

wp_list_bookmarks

Displays bookmarks found in the Administration > Links panel.

```
<?php wp_list_bookmarks($args); ?>
```

T Arguments include: Category Parameters, Tag Parameters, Author Parameters, Post & Page Parameters, Sticky Post Parameters, Time Parameters, Pagination Parameters, Offset Parameter, Orderby Parameters, Order Parameters, Custom Field Parameters, Combining Parameters.

get_bookmarks

This function returns an array of bookmarks found in the Administration > Blogroll > Manage Blogroll panel.

```
<?php get_bookmarks($args); ?>
```

\$args / orderby | order | limit | category | exclude | category_name | category_name | hide_invisible | show_updated | echo | categorize | title | title_before | title_after | category_orderby | category_order | class | category_before | category_after | category_hide_invisible | show_updated | include | search

get_bookmark

Retrieves Bookmark data based on bookmark link ID.

```
<?php get_bookmark  
    ($bookmark, $output, $filter) ?>
```

\$bookmark {int} / \$output {s} / \$filter {s}

★ TITLE

wp_title

Displays or returns the title of the page.

```
<?php wp_title($sep, $echo, $seplocation); ?>
```

\$sep {s} / \$echo {s} / \$seplocation {s}

single_post_title

Displays or returns the title of the post when on a single post page (permalink page).

```
<?php single_post_title($prefix, $display); ?>
```

\$prefix {s} / \$display {s}**single_cat_title**

Displays or returns the category title for the current page.

```
<?php single_cat_title($prefix, $display); ?>
```

\$prefix {s} / \$display {s}**single_month_title**

This tag displays the date (and time) a post was last modified. This tag works just like the_modified_time(), which also displays the time/date a post was last modified.

```
<?php single_month_title($prefix, $display); ?>
```

\$prefix {s} / \$display {s}

T Arguments include: Category Parameters, Tag Parameters, Author Parameters, Post & Page Parameters, Sticky Post Parameters, Time Parameters, Pagination Parameters, Offset Parameter, Orderby Parameters, Order Parameters, Custom Field Parameters, Combining Parameters.

★ INCLUDE TAGS

get_header
Includes the header.php template file from your current theme's directory.

<?php get_header(\$name); ?>

\$name {s}

get_sidebar

Includes the sidebar.php template file from your current theme's directory.

<?php get_sidebar(\$name); ?>

\$name {s}

get_search_form

Display search form using searchform.php theme file.

<?php get_search_form(); ?>

comments_template

Loads the comment template. For use in single post and page displays.

<?php comments_template(\$file, \$separate_comments); ?>

\$file {s} / \$separate_comments {b}

get_footer

Includes the footer.php template file from your current theme's directory.

<?php get_footer(\$name); ?>

\$name {s}

★ LISTS AND DROPODOWN TAGS

bloginfo

Displays information about your blog, mostly gathered from the information you supply in your User Profile and General Options from the WordPress Administration Panels

<?php bloginfo(\$show); ?>

\$show {s} / admin_email | atom_url | charset | comments_atom_url | comments_comments_rss2_url | description_url | language_name | pingback_url | rdf_url | rss2_url | rs2_url | siteurl_stylesheet_directory_stylesheet_url | template_directory | template_url | text_direction | version | wpurl

wp_list_authors

Displays a list of the blog's authors (users), and if the user has authored any posts, the author name is displayed as a link to their posts.

<?php wp_list_authors(\$args); ?>

\$args / optioncount | exclude_admin | show_fullname | hide_empty | echo | feed | feed_image | style | html

wp_list_categories

Displays a list of Categories as links.

<?php wp_list_categories(\$args); ?>

\$args / show_option_all | orderby_order | show_last_update | style | show_count | hide | empty | use_desc_for_title | child_of | feed | type | feed_image | exclude | exclude_free | include | current_category | hierarchical | title_li | number | echo | depth

wp_list_pages

Displays a list of WordPress Pages as links.

<?php wp_list_pages(\$args); ?>

\$args / depth | show_date | date_format | child_of | exclude | include | title_li | echo | authors | sort_column | link_before | link_after | exclude_tree

bloginfo_rss

Displays information about your blog, mostly gathered from the information you supply in Users > Your Profile and General Options from the WordPress Administration Panels

<?php bloginfo_rss(\$show); ?>

\$show {s} / name | description | url | rdf_url | rss_url | rs2_url | atom_url | pingback_url | pingback_rurl | admin_email | charset | version | html_type | wpurl | template_url | template_directory_stylesheet_url | stylesheet_directory

which can then be used elsewhere in your PHP code.

<?php \$bloginfo = get_bloginfo(\$show); ?>

get_bloginfo

The get_bloginfo() function returns information about your blog which can then be used elsewhere in your PHP code.

<?php \$bloginfo = get_bloginfo(\$show); ?>

\$show {s} / name | description | url | home | siteurl | description | wpurl | rdf_url | rss_url | rs2_url | atom_url | comments_rss2_url | pingback_url | stylesheet_directory | template_directory | template_url | admin_email | charset | version | html_type

get_bookmarks

Displays bookmarks found in the Administration > Links panel.

<?php wp_list_bookmarks(\$args); ?>

\$args / orderby | order | limit | category | exclude | category_name | hide_invisible | show_updated | echo | category_title | title_before | title_after | category_orderby | category_order | class | category_before | category_after

wp_dropdown_categories

Displays a list of categories in a select (i.e dropdown) box with no submit button.

<?php wp_dropdown_categories(\$args); ?>

\$args / show_option_all | show_option_none | orderby_order_show | last_update | show_count | hide_empty | child_of_exclude | echo | selected | hierarchical | name | class | depth

get_bloginfo_rss

RSS container for the bloginfo function.

<?php get_bloginfo_rss(\$show) ?> {s}

\$show {s} / name | description | url | rdf_url | rss_url | rs2_url | atom_url | comments_rss2_url | pingback_url | admin_email | charset | version | html_type | wpurl | template_url | template_directory | stylesheet_url | stylesheet_directory

wp_dropdown_users

Create dropdown HTML content of users.

<?php wp_dropdown_users(\$args); ?>

\$args / show_option_all | show_option_none | orderby_order_include | exclude | multi | show | echo | selected | name | class

wp_dropdown_comments

Displays all comments for a post or Page based on a variety of parameters including ones set in the administration area.

<?php wp_list_comments(\$args); ?>

\$args / walker | max_depth | style | callback | end_callback | type | page | per_page | avatar_size | reverse_top_level | reverse_children

★ LOGIN / LOGOUT TAGS

is_user_logged_in

This Conditional Tag checks if the current visitor is logged in. This is a boolean function, meaning it returns either TRUE or FALSE.

```
<?php if ( is_user_logged_in() ) { ... } ?>
```

the_ID

Displays the numeric ID of the current post.

```
<?php the_ID(); ?>
```

the_excerpt

Displays the excerpt of the current post with [...] at the end, which is not a "read more" link.

```
<?php the_excerpt(); ?>
```

previous_posts_link

This creates a link to the next posts. Yes, it says "previous posts," but it's named that just to confuse you. It assumes that your posts are displaying in reverse chronological order (most recent posts first) causing the previous page to show posts from later in the timeline.

```
<?php previous_posts_link( $max_pages ); ?>
```

wp_login_url

This Template Tag returns the URL that allows the user to log into the site.

```
<?php echo wp_login_url( $redirect ); ?>
```

```
$redirect {s}
```

the_content

Displays or returns the title of the current post.

```
<?php the_title( $before, $after, $display ); ?>
```

the_title_rss

Displays the title of the current post, formatted for RSS.

```
<?php the_title_rss(); ?>
```

the_excerpt_rss

Displays the excerpt of the current post formatted for RSS.

```
<?php the_excerpt_rss(); ?>
```

wp_link_pages

Displays page-links for paginated posts (i.e. includes the [...] nextpage->Quicktag one or more times).

```
<?php wp_link_pages( $args ); ?>
```

wp_logout_url

This Template Tag returns the URL that allows the user to log out to the site.

```
<?php echo wp_logout_url( $redirect ); ?>
```

```
$redirect {s}
```

wp_lostpassword_url

This Template Tag returns the URL that allows the user to retrieve the lost password.

```
<?php echo wp_lostpassword_url( $redirect ); ?>
```

wp_logout

Logs the current user out, by destroying the current user session.

```
<?php wp_logout(); ?>
```

the_content_rss

Displays the content of the current post.

```
<?php the_content_rss(); ?>
```

wp_register

Displays a login link, or if a user is logged in, displays a logout link. An optional, redirect argument can be used to redirect the user upon login or logout.

```
<?php wp_register( $redirect ); ?>
```

```
$redirect {s}
```

previous_post_link

This creates a link to the previous posts. Yes, it says "next posts," but it's named that just to confuse you. It assumes that your posts are displaying in reverse chronological order (most recent posts first) causing the next page to show posts from earlier in the timeline.

```
<?php previous_post_link( $label, $max_pages, $int ); ?>
```

the_content

Displays the contents of the current post.

```
<?php the_content(); ?>
```

```
$more_link_text {s} / $strip_teaser {b} / $more_file {s}
```

the_content_rss

Displays the content of the current post formatted for RSS.

```
<?php the_content_rss(); ?>
```

wp_loginout

Logs the current user out, by destroying the current user session.

```
<?php wp_loginout( $redirect ); ?>
```

```
$redirect {s}
```

the_tags

This template tag displays a link to the tag or tags a post belongs to.

```
<?php the_tags( $separator, $before, $after ); ?>
```

```
$before {s} / $separator {s} / $after {s}
```

the_category

Displays a link to the category or categories a post belongs to.

```
<?php the_category( $separator, $parents ); ?>
```

```
$separator {s} / $parents {s}
```

the_meta

Displays an unordered list of meta "key:value" pairs, or the post-meta, for the current post.

```
<?php the_meta(); ?>
```

```
$before {s} / $after {s}
```

the_tags

This template tag displays a link to the tag or tags a post.

```
<?php the_tags( $separator, $before, $after ); ?>
```

```
$before {s} / $separator {s} / $after {s}
```

the_category_rss

Used on single post permalinks, this template tag displays a link to the previous post which exists in chronological order from the current post.

```
<?php previous_post_link( $label, $max_pages, $int ); ?>
```

```
$label {s} / $max_pages {int}
```

the_content_rss

Used on single post permalinks, this template tag displays a link to the next page attached to the current post.

```
<?php next_post_link( $label, $max_pages, $int ); ?>
```

```
$label {s} / $max_pages {int}
```
